EXPERIENCE

Sr. Associate	American Express	Aug 2021 – Present
- Software developer working on the web application that facilitates the development, testing, governance, and deployment of Machine Learning (ML) models at Amex. - Built and took ownership of a pivotal pipeline that bridges the gap between the data scientists and the real-time execution platform, directly supporting ML models with a combined pre-tax income (PTI) benefit of over \$50 million in 2023. - Led the tech revamp for the application's monolithic codebase to service-oriented architecture for better maintainability. - Designed and developed the CI/CD pipeline for the application, in addition to infrastructure maintenance and environment planning. This eliminated manual errors and significantly reduced the time-to-market for new features and bug fixes. - Managed a team of seven colleagues to build Python modules and standalone software capabilities, aiding the Decision Science teams in developing and upgrading the ML models more efficiently. This brought down the time-to-market by several weeks for each ML model, benefiting 20+ data science teams. - Promoted from Associate to Sr. Associate in February 2023.		

Intern	American Express	Jan 2021 – Jun 2021
- Programmed six manual processes into end-to-end automated pipelines using Selenium, Pandas, Requests, and Flask. - Coded 100+ rules for the Dynamic Authorization of Credit (DAC) system that utilize scores from in-house ML models to take the final decisions.		

iOS Development Intern	CS Soft Solutions Pvt. Ltd.	May 2019 – Jul 2019
- Augmented Reality Home Planner: Used Apple ARKit to develop an iOS app for a furniture store enabling users to place virtual 3D models of various items in their space to see how they would look and make informed decisions. - Food Delivery App: Implemented GPS tracking in a food delivery app using Core Location, in addition to finding and displaying the optimal route between pickup and drop locations using the Directions API.		

EDUCATION

Master's Degree (ongoing)	BITS, Pilani	Jan 2023 – Dec 2024 (exp.)
Master of Technology (M.Tech.) in Software Engineering with current CGPA of 9.2/10		
Bachelor's Degree	Panjab University, Chandigarh	Jul 2017 – Jun 2021
Bachelor of Engineering (B.E.) in Information Technology with CGPA of 8.2/10 (with Honors)		

SKILLS & TECHNOLOGIES

- Languages: Python, C++, Swift, Java, Bash, SQL
- Tools: PyTorch, fast.ai, scikit-learn, *nix Systems, Git CLI, Jenkins, Docker, Kubernetes
- Deep Learning, Web Development, iOS Development

ACHIEVEMENTS

- Achieved 4* on CodeChef with a rating of 1902 in 2022
- Graduated with the 6-month Deep Learning Nanodegree by Udacity and Facebook AI in 2019. Recipient of full scholarship by Facebook with an acceptance rate of 3% out of 10,000 global applicants. Credential ID: [C9HLTFDN](#)

PROJECTS

- Cosmic Artifact Filter:** Trained a Deep Learning model (Convolutional Neural Network) using fast.ai to flag cosmic artifacts in satellite imagery for deeper analysis using image data from NASA's MESSENGER spacecraft orbiting the planet Mercury.
- Dark Matter Discovery:** Built a pipeline to visualize and confirm the presence of dark matter in cosmic data based on the principle of Strong Gravitational Lensing, using PyAutoLens.
- Live Accident Detection:** Used Transfer Learning to train an ML model capable of processing live video camera feed at traffic intersections to spot road accidents. Secured 3rd place at OctaHacks Hackathon 2019.
- [Brain-Computer Interfacing] Cognitive Neuroscience:** Wrote Arduino software in C to detect muscle artifacts in real-time EEG data collected from the NeuroSky MindWave headset, with the potential for upgraded brain mapping by attenuation of the recognized artifacts. It was tested on the Left Frontal Lobe with >95% accuracy.
- [iOS Software Development] Price Aggregator for Resellers:** Developed an iOS app in Swift for a client in Bristol, United States, that scans product barcodes using AVFoundation and aggregates the price history from different sources.

VOLUNTEER & ADDITIONAL EXPERIENCE

- Speaker at the Programming Club, UIET:** Guided freshmen CS students and taught introductory Machine Learning.
- Mowgli Aid:** Volunteering to rescue and rehabilitate stray and injured animals in the Chandigarh Tricity Area.
